DETAILED ACTION

Applicants' arguments, filed 10/13/04, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

PRIOR ART

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 9, and 13 are rejected under 35 U.S.C. 102(e)(2) as being clearly anticipated by Black et al. (P/N 6,207,647).

This rejection is maintained and reiterated from the previous office action, mailed 6/14/04. Applicants argue that the polynucleotide of the reference is not in the proper reading frame for encoding a polypeptide of SEQ ID NO: 1140 via the polynucleotide as claimed. In response the polynucleotide of the reference has been documented in the previous office action, mailed 6/14/04, as containing the sequence which contains the encoding codons therein for SEQ ID NO: 1140 and thus applicants' argument is contrary to the factual basis for this rejection and therefore non-persuasive.

Art Unit: 1631

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 2, 3, and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Southern (WO 89/10977).

This rejection is maintained and reiterated from the previous office action, mailed 6/14/04. Applicants argue that fails to establish a prima facie case due to not appearing to teach any *C. trachomatis* polynucleotides. In response, Southern was previously discussed as describing arrays of polynucleotide probes including "all sequences" of a given length which thus is clearly suggested and motivated to include probes complementary to and hybridizable to any sequence such as those instantly claimed via hybridizable characterizations as in instant claims 2, 3, and 30. This argument is therefore not directed to the "all sequences" basis of this rejection and therefore non-persuasive regarding hybridizable embodiments in the above listed instant claims.

CLAIM OBJECTIONS

Art Unit: 1631.

Claims 8, 10-12, 14-16, 51, and 52 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 57-65 are allowable.

THIS ACTION IS MADE FINAL. Applicants are reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
